Subject: UPDATE FROM TY

Earlier today, the Department of Energy announced the Hanford Site will remain in an essential mission-critical operations posture for next week. Some of us will conduct limited planning activities while teleworking and limited on-site work will continue. Thank you all for your commitment.

This week, we reached out to a few community organizations especially hard hit during this time. We provided corporate financial support to the Union Gospel Mission, Tri-Cities Food Bank, Meals on Wheels and United Way. I know there are a lot of you who are doing your part to support our community during this time as well. Thank you!

I once again ask you to please take care of yourselves, your family members and your coworkers. It is hard to stay connected during this time, but please make the extra effort to pick up the phone for a call or go to the computer for a video chat.

Remember, this situation affects us all differently. Hang in there, stay safe and [let us know](#) if you have questions.
