Subject: CONFIRMED CASE OF COVID-19

As we have seen the last few weeks, the coronavirus continues to affect us locally. That continues to be the case as one of our CH2M HILL Plateau Remediation Company coworkers recently received a positive diagnosis for COVID-19. The employee's last day at work was April 14, 2020.

The facility where the individual works has already been cleaned in accordance with Centers for Disease Control and Prevention (CDC) guidelines, so no further actions are necessary. Our ongoing, enhanced cleaning protocols continue across the site per CDC guidelines. CHPRC and the Hanford Site will continue to follow guidance from the CDC and state and county public health agencies.

I am intentionally not releasing this person's name in an effort to protect their privacy. However, the Hanford Site is a close-knit family, so I ask that we all remember to wish this person, and everyone affected by this situation over the past few weeks, the absolute very best.

The Benton Franklin Health District (BFHD) is in contact with those who have tested positive regarding next steps. Please refer to the District's [website](#) for more information regarding its processes.

This is a time of uncertainty and distraction as we work to keep ourselves, our families and our coworkers safe and healthy. Please let that be your primary focus.

I will update you as new information is available.
