Subject: RETURN TO WORKPLACE COMMUNICATIONS

This week, the CH2M HILL Plateau Remediation Company team continued its activities to support a phased remobilization, preparing for more employees beginning to return to the workplace over the coming weeks. I want to again thank everyone involved in the planning as well as the mission critical essential work that we have safely continued over the past couple of months.

If you are scheduled to return to the workplace over these next couple of weeks, your manager will be in contact with you. For those assigned to return to work in this phase, you can check your anticipated return to workplace date on [this website](#). Please check the website frequently and remain in contact with your managers as future return to workplace assignments are made.

Whether you are returning to the workplace next week or continuing to work from home, please continue to be flexible and use patience as we learn and adjust to the new controls and work processes we put in place to respond to the global pandemic. This will continue to affect all of us differently, so please continue watching out for yourselves and each other.
