CH2008-03

From: Ty Blackford, President and CEO
To: CHPRC Employees (please cascade)
Subject: PRACTICE SAFETY 24/7

Next week, CH2M HILL Plateau Remediation Company will continue remobilization, bringing back a small number of employees to support work at Waste and Fuels, groundwater sampling and drilling and field work for our upcoming aging structures stabilization efforts.

While we've seen a decline in COVID-19 cases locally and across the state, we must continue to be vigilant about our health and the health of our coworkers. Don't let your guard down; practice Safety 24/7.

Help each other be stewards of the new control set we've developed, and practice those throughout the day, including on breaks. The use of face coverings and the respect of social distancing requires a constant effort. Please allow these practices to become a habit. A few months ago, donning my gaiter was something I had to constantly think about. These days, it is second nature.

Finally, stay home if you are sick or think you might be. That is the easiest way to protect your coworkers and community.

Let me know if you have any questions. Stay in touch, stay safe and stay healthy.
