Directions for Remote Desktop Connection (RDP)

Remote Desktop will allow users that normally use desktop computers to connect to, and use their desktop computers remotely.

Once connected to VDI environment (through VMWare Horizon Client):

- *Click* **Start** > **Remote Desktop Connection** (Figure 1)

  OR

  Click **Start** > *Type* "**Remote**" > *Choose* **Remote Desktop Connection** (Figure 2)

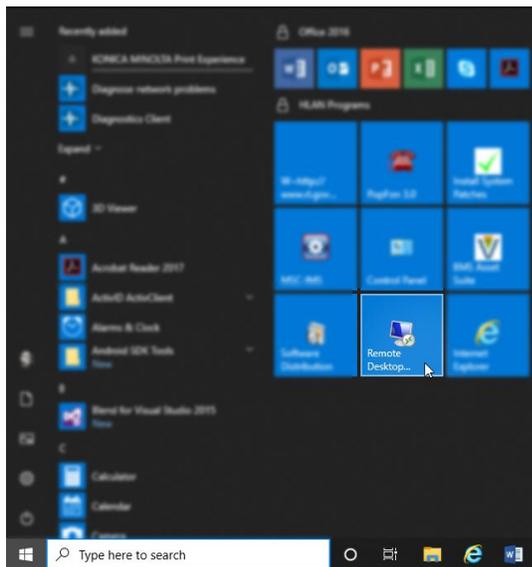

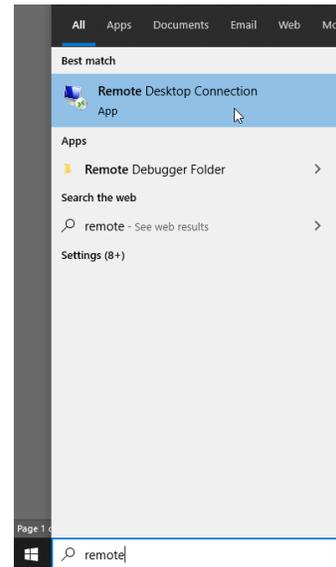

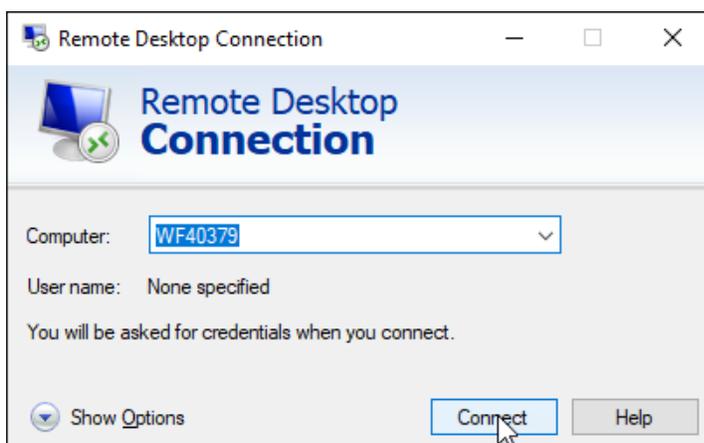

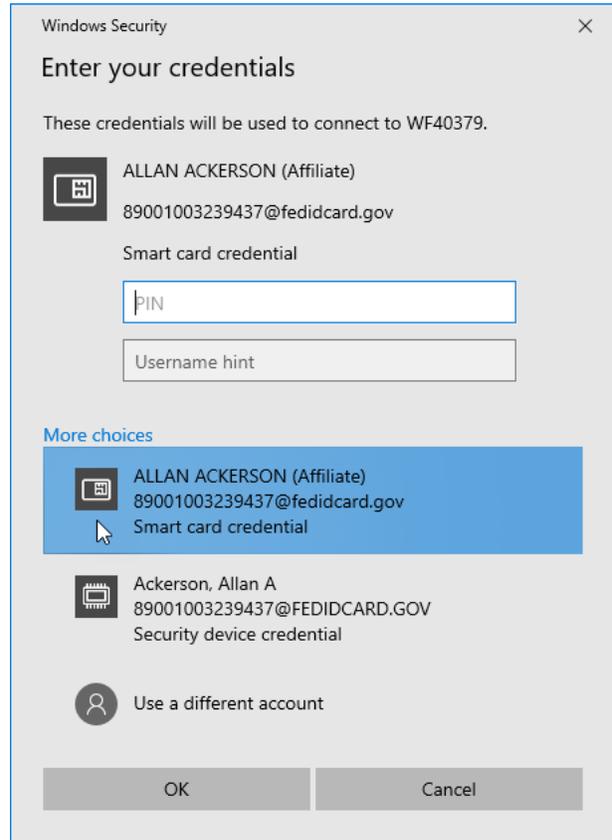

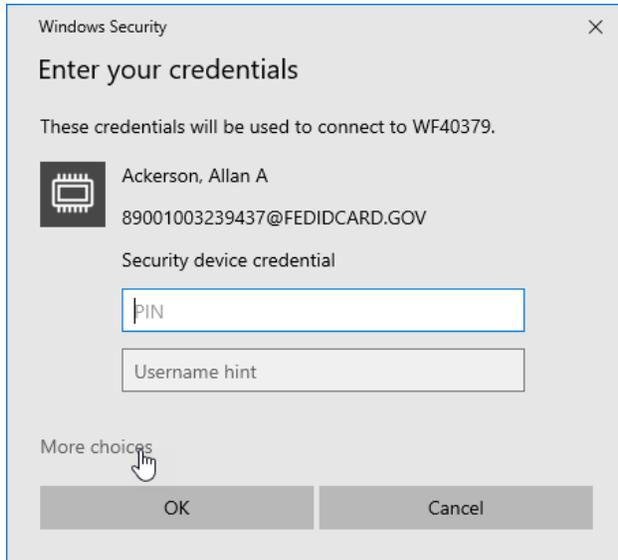

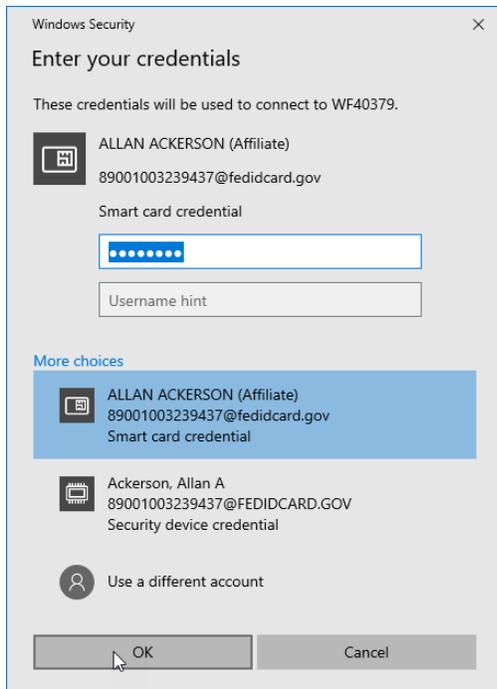

Figure 1

Figure 2

- *Enter* your computer **property number** and *click* **Connect**.
 Note: you will need to know this number before you attempt to RDP.

- *Insert* your **Smartcard** and *choose* the **Certificate**. If the appropriate certificate is not showing, *click* **More choices**

- *Enter* your **PIN** and *click* **OK**

- You should now be connected to your desktop.

- To disconnect, you can either *click* the **X** on the menu bar OR
Click **Start** and *choose **Disconnect***.
NOTE: Please do not choose shutdown, as your computer must be on to reconnect.
