Change Summary

Description of Change

Revisions to align policy with changes in the new ISO 14001:2015 Standard.

CH2M HILL Plateau Remediation Company Environmental Policy

Published Date: 04/10/18

Effective Date: 04/10/18

1.0 PURPOSE AND SCOPE

The purpose of this policy is to provide management expectations for environmental protection and improvement that align with ISO 14001 standard requirements. The scope of this policy includes all CH2M HILL Plateau Remediation Company (CHPRC) operations under Plateau Remediation Contract Number DE-AC06-08RL14788 at Hanford.

2.0 POLICY

It is CHPRC policy to be responsible stewards of the environment while meeting its mission of cleaning up the Hanford Central Plateau and protecting the Columbia River. Sustainable environmental stewardship practices shall be incorporated as a core value in all our operations. CHPRC is committed to achieving environmental excellence through the systematic integration of environmental protection, as well as worker health and safety protection and quality principles, throughout our operations. To this end, CHPRC will establish, document, implement, maintain, and continually improve an environmental management system (EMS) that will be an integral component of the CHPRC Integrated Safety Management System.

In support of this policy, CHPRC shall:

- Comply with applicable environmental obligations.
- Implement environmental sustainability practices, including resource conservation, waste minimization, pollution prevention, chemical management, and green purchasing.
- Assess our activities and promptly report and seek to correct environmental incidents and deficiencies.
- Determine on an annual basis the aspects of our operations that impact the environment and establish objectives for environmental improvement, and implement planned actions to achieve them.
- Provide CHPRC workers and stakeholders with timely, accurate, and meaningful information related to our environmental performance.
- Conduct on an annual basis, a review of our environmental performance, identifying programmatic strengths, weaknesses and areas needing improvement, and providing results of this review to CHPRC top management.
- Work, with input from CHPRC workers, and external stakeholders when practical or required, to continually improve our EMS and our environmental performance.

This environmental policy shall be communicated internally to all CHPRC workers, made available externally to interested parties, and maintained as documented information. All CHPRC workers are expected to be aware of and adhere to this policy within their areas of responsibility.
