

VMWare and Multiple Monitors

Before you begin you need to make sure the monitor is connected to your computer, turned on and in extended mode:

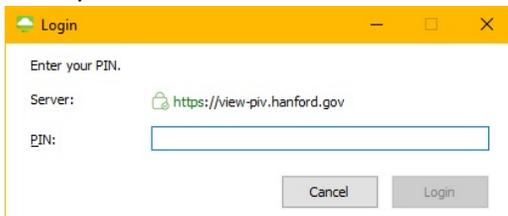

1. After connecting the monitor(s) and assuring that it is/they are on and has a picture
 - Right-click on the desktop and choose **Display Settings**
 - Scroll down to **Multiple Displays** and use the dropdown to select **Extend these displays**
 - Click on **Keep changes**
2. Start the VMWare logon process
 - Double-click on the VMWare icon in the Start menu or on the Desktop
 - Double-click on the view-piv.hanford.gov box

- Accept the Hanford message

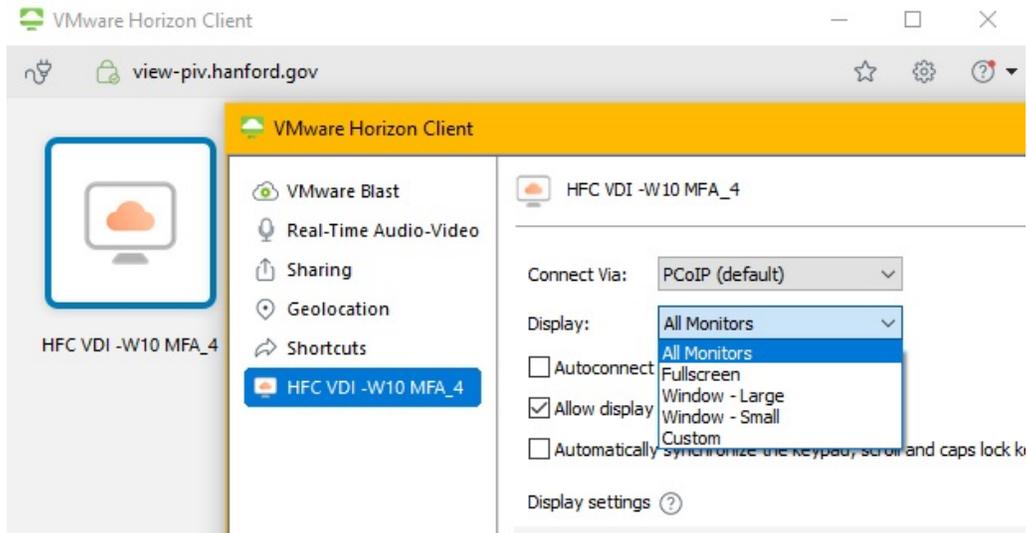

- If given the choice of certificate, select **More Choices** and find your name or HID
- Enter your PIN

On the following screen

- Left-click on **HFC VDI-W10 MFA_4** box once.
- Choose the gear icon, shown in the image.
- Make sure the Display dropdown has All Monitors selected.
- Click OK

Alternately

- Right-click on the **HFC VDI-W10 MFA_4** box
- hover over **Display** and make sure **All Monitors** is checked
